## **DETAILED ACTION**

### ***Response to Amendment***

1. The present Office action is made in response to the amendment filed on 9/4/2007. It is noted that in the amendment, applicant has made changes to the abstract, the specification, the drawings and the claims. Regarding to the claims, applicant has canceled claims 1-10 and added a new set of claims, i.e., claims 11-20, into the application. A review of the device as recited in the newly-added claims 11-20 has resulted that the device of new claims has the same scope as that of the original now canceled claims, thus all pending claims 11-20 are examined in this Office action.

### ***Oath/Declaration***

2. The objection to the Oath set forth in the previous Office action is withdrawn because applicant has provided a complete mailing address for each of inventor in the application Data sheet filed on 12/27/2005.

### ***Drawings***

3. The two replacement sheets contained figures 3-7 were received on 9/4/07 and approved by the examiner. As a result, the application now contains two sheets of figures 1-2 and 8-10 as filed on 12/27/05 and two replacement sheets contained figures 3-7 as filed on 9/4/07.

4. The objections to the drawings as set forth in the previous Office action are overcome by the amendments to the drawings as filed in the amendment of 9/4/07.

Art Unit: 2872

***Specification***

5. The lengthy specification which was amended by the amendment of 9/4/07 has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
6. The objections to the specification as set forth in the previous Office action are overcome by the amendments to the specification as filed in the amendment of 9/4/07

***Allowable Subject Matter***

7. Claims 11-20 are allowed.
8. The following is an examiner's statement of reasons for allowance:

The slide feeding unit for a microscope as recited in the independent claim 11 is patentable with respect to the prior art, in particular, the U.S. Patent Nos. 4,427,332; 6,847,481 and 5,690,892 by the limitations related to the structure of the unit for feeding the slides. It is noted that while the use of a mechanism having means for transporting the slides in vertical direction and in horizontal direction wherein the mechanism comprises gear train, pinion/toothed rack formed on one surface of a magazine/cassette is known to one skilled in the art as can be seen in the mentioned Patents; however, the cited art does not disclose a magazine moving mechanism having a trough, shafts, driving means; lifting gears, driving worm gears, ...with their structural relationships are recited in the features thereof "a magazine moving mechanism...lifting gears" recited on lines 14-39 of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
